

Session 1: Introduction to Web Design
Coverage: How browsers render HTML + CSS. Difference between front-end & back-end. Developer tools overview (Chrome DevTools). Demo: Inspect elements on Instagram home page. Depth: Conceptual understanding of DOM structure.

Q1. Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.

Ans. **Tag name : img**

Class Name : _aagv

Or

Image Container Tag : div

Class : _aagv

Q4. Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).

Ans. Parent → Child Relationships

1. **html**
 - **head**
 - **body**
2. **body**
 - **h1**
 - **img**
 - **p**
3. Content inside elements
 - h1 → Text ("Drashti Patel")
 - p → Bio text
 - img → Image attributes (src, alt, width)

This diagram shows **3+ levels**:

html → body → h1 → text

which satisfies the requirement of showing the DOM hierarchy.
